Ø=ÜÌ Trabajo 8:
Título: Full Stack Python Engineer
Empresa: Pearl Talent
Ubicación: Colombia
Salario: $5
Descripción: DescriptionWork Arrangement: Fully remote, overlapping EST working hours.Job Type: Full-timeSalary Range: based on experience, with performance-based bonuses.Work Schedule: 40 hours per week, with core hours between 9 AM – 5 PM EST (flexible based on sprint deadlines).Locations: Remote, open to candidates globally.About Pearl TalentPearl works with the top 1% of candidates from around the world and connects them with the best startups in the US and EU. Our clients have raised over $5B in aggregate and are backed by companies like OpenAI, a16z, and Founders Fund. They're looking for the sharpest, hungriest candidates who they can consistently promote and work with over many years. Candidates we've hired have been flown out to the US and EU to work with their clients, and even promoted to roles that match folks onshore in the US.Hear why we exist, what we believe in, and who we're building for:Why Work with Us?We're not just another recruiting firm—we focus on placing candidates with exceptional US and EU founders who prioritize the long-term success of their team members. We also provide retention bonuses at 3, 6, 9, and 12 months, as well as community-driven benefits like an annual retreat.Role OverviewAs a Full Stack Python Engineer, you'll take ownership of our Integrations Platform - the infrastructure that powers external system connectivity and real-time, AI-driven workflows. This role blends deep backend expertise with strong frontend skills, as you'll be building both robust API integrations and intuitive UI components for our visual workflow builder. You'll work across the full product lifecycle, translating complex business needs into scalable software that directly impacts customers. Ideal for engineers who thrive at the intersection of product and code, and who want to help define the future of intelligent, configurable SaaS.Key ResponsibilitiesBack-End Development:Own the integrations platform that connects external systems to real-time, AI-driven workflows.Design and scale FastAPI services that support dynamic, customer-configurable workflows.Build reusable, intelligent backend nodes using Python, FastAPI, and LangGraph to automate key business logic.Interface with both modern APIs and legacy enterprise systems (e.g., SOAP/XML).Optimize PostgreSQL queries and ensure high system reliability with Redis-backed caching.Front-End Development:Develop and maintain the visual workflow builder using React and TypeScript (Next.js).Translate complex backend logic into clear, intuitive UI components used directly by customers.Work closely with product and design to ensure frontend UX aligns with customer needs.AI & Infrastructure Integration:Implement AI-powered automation nodes using OpenAI, LangChain, and Google Cloud AI services.Maintain clean, containerized deployment workflows using Docker and Google Cloud Platform.Cross-functional Collaboration:Partner with product stakeholders to shape features from concept to production.Translate real-world customer pain points into scalable software solutions.Contribute to product strategy with a strong understanding of usability and business impact.RequirementsMust-Have:5+ years of professional full-stack engineering experienceSolid experience with Python (FastAPI), PostgreSQL, and modern backend architectureFrontend proficiency in React, TypeScript, and component-based designExperience delivering customer-facing features - not just internal toolsStrong product thinking - you care about the "why" behind the codeComfortable working with both RESTful and legacy APIs (e.g., SOAP/XML)Strong communication skills and remote collaboration habitsNice-to-Have:Experience with

workflow automation tools or visual buildersFamiliarity with logistics platforms or enterprise system integrationsBackground in AI/ML tools (LangChain, LangGraph, OpenAI APIs)Hands-on with Docker and deployment on Google CloudWhat You'll Love About This RoleYou'll be building software that feels like magic to our users - combining powerful backend workflows, sleek UI, and AI to automate the world's most complex industries. This is your chance to take ownership of critical systems and help shape a platform poised to redefine how vertical SaaS gets built.BenefitsCompensation PackageCompetitive Salary: Based on experience and skillsRemote Work: Fully remote—work from anywhereGenerous PTO: Ample paid time off to rest and rechargeDirect Mentorship: Grow through guidance from international industry expertsLearning & Development: Ongoing access to resources for professional growthGlobal Networking: Work and connect with professionals around the worldWork-Life Balance: Flexible hours that support a healthy work-life balanceOur Recruitment ProcessApplicationScreeningTop-grading InterviewSkills Assessment: Technical Assessment + Internal AssessmentClient InterviewJob OfferClient OnboardingReady to Join Us?If this role aligns with your skills and career goals, we'd love to hear from you. They're looking for the sharpest, hungriest candidates who they can consistently promote and work with over many years. Candidates we've hired have been flown out to the US and EU to work with their clients, and even promoted to roles that match folks onshore in the US.Hear why we exist, what we believe in, and who we're building for:Why Work with Us?We're not just another recruiting firm—we focus on placing candidates with exceptional US and EU founders who prioritize the long-term success of their team members. We also provide retention bonuses at 3, 6, 9, and 12 months, as well as community-driven benefits like an annual retreat.About the CompanyOur client is a U.S.-based healthcare organization focused on increasing access to life-saving medications for patients with chronic conditions. They partner with leading hospitals, pharmacies, and healthcare providers across the U.S. to simplify the patient care process and ensure timely, affordable treatment.We're looking for a Patient Care Scheduler to support our rapidly growing provider network. This is a mission-driven role ideal for someone who is organized, persistent, and passionate about creating better health outcomes.Role Overview:As a Provider Liaison & Scheduler, you'll be responsible for coordinating with healthcare providers and pharmacies to secure signed Collaborative Practice Agreements (CPAs) and schedule clinical consultations between patients and pharmacists. You'll handle high-volume outreach, document communications in our CRM system, and ensure patients move efficiently through the scheduling process.This role is ideal for someone with a healthcare coordination background, strong communication skills, and the ability to follow through across multi-step processes.Purpose of Your RoleTo ensure that every patient referred into our program can quickly access the clinical care they need—by securing CPA signatures from providers and efficiently scheduling consultations. You'll streamline the path between physician, pharmacist, and patient, directly improving patient access and care timelines.Requirements1. Provider Outreach & CPA CoordinationReach out to physician offices via phone, email, and online fax to introduce and secure CPAsExplain the purpose and process of CPAs to medical staffPersistently follow up on unsigned agreements using standardized scripts and sequencesAccurately log all communication and document status in the CRM2. Patient Scheduling SupportOnce CPAs are secured, schedule patients for consultations with pharmacy partnersCoordinate schedules between patients and clinical teamsConfirm and document all appointments, reschedules, and follow-ups3. Data Management & ReportingMaintain clean, up-to-date CRM records for every provider and patient caseIdentify and escalate unresponsive or rejecting providers to U.S. teamSubmit weekly activity and performance reports to the operations team4. Workflow Optimization (Growth

Opportunity)Proactively identify bottlenecks or inefficiencies in outreach and scheduling processesRecommend improvements or new SOPs to streamline operationsCollaborate with other schedulers (as the team grows) to share learnings and best practicesPreferred Experience1–2+ years in U.S. healthcare operations, patient coordination, or provider support rolesProven experience speaking with physicians, clinic staff, or healthcare providersFamiliar with CRMs (e.g., Telescope), online fax tools, Google Sheets, and remote collaboration tools like Slack and WhatsAppPast experience working with U.S.-based teams in a fully remote roleKey Skills & AttributesClear, confident communicator – able to explain complex workflows to medical professionalsPersistent and detail-oriented – follows up thoroughly and tracks progress accuratelyCritical thinker – makes suggestions to improve processes and flag issuesIndependent and proactive – thrives in a remote setting with minimal hand-holdingBilingual (Spanish a plus) – many patients prefer or benefit from Spanish-speaking supportBenefitsPotential for profit share based on performanceFully WFH, foreverAnnual team retreatUnlimited PTOPotential Growth OpportunitiesOur Recruitment Process:ApplicationScreeningSkills AssessmentTop-grading InterviewFinal InterviewJob OfferOnboardingReady to Join Us?If this role aligns with your skills and career goals, we'd love to hear from you. Título: Hyatt ServiceNow Engineer – React development and Custom Applications - Remote Opportunity – Valid U.S. visa requires
Empresa: AMSTAR OPERACIONES DMC MX
Ubicación: Benito Juárez, Quintana Roo
Salario: $ 16,521
Descripción: The OpportunityHyatt Hotels Corporation seeks an enthusiastic ServiceNow Engineer who is a passionate problem solver and delivers solutions to join our ServiceNow Department where you'll join a team of seven ServiceNow professionals who love what they do. In this role, you will be collaborating closely with the broader Hyatt Financial Shared Services, IT teams, and non-IT teams where you'll be instrumental in continuing to make Hyatt a leading hospitality company. With your abilities to research and understand new process and procedures along with your strong desire to learn, you'll be developing, implementing, and migrating on a mature ServiceNow instance. You'll use your deep understanding of ITSM core configurations, JavaScript, HTML while accurately breaking down tasks, unit testing, and delivering on time and in scope. You'll be part of a team that is passionate about diversity, equity, and inclusion, is committed to nurturing curiosity and new skills with the ability to use feedback critical for growth, and building connections across the organization with stakeholders, colleagues, and guests.Who You AreAs our ideal candidate, you understand the power and purpose of our Culture of Care and embody our core values of Empathy, Inclusion, Integrity, Experimentation, Respect and Wellbeing. You enjoy working with a close fun team, are results driven, and want a variety of opportunities to develop personally and professionally.At Hyatt Hotels, ServiceNow is a major productivity solution and is a very important part of our mission to take care of people so they can be their best. ServiceNow Engineers serve on a professional deployment team to architect and deploy solutions within the ServiceNow platform for our Hyatt customers. Engineers provide administrative ServiceNow support, including troubleshooting, implementing bug fixes, and root cause analysis while using their ability to develop, configure, integrate, and/or implement with knowledge of the platform helping Hyatt keep up to date and enabling the best ServiceNow platform experience possible.Responsibilities:• Interact with customer team members to capture business requirements and translate them into appropriate technical solutions.• Commit to the continuous improvement and learning of development and ServiceNow best practices, tools, and technology• Support and develop in Hyatt's custom Financial and Customer Service modules in ServiceNow• Responsible for providing accurate and up to date documentation on current ITSM processes or Custom Applications, using understandable business language• Monitors health, usage, and overall compliance of the ServiceNow platform• Works directly with ServiceNow Architect- IT and ServiceNow Manager to align the

ServiceNow application with IT organization strategy• Works with key Financial Process Owners and leadership on priorities and being the main contact on the custom applications• The position responsibilities outlined above are in no way to be construed as all encompassing.
